the bridges are vital structures for the transport infrastructure it is a fact that in the last decades composite bridges became a well liked solution in many european countries as a cost effective and aesthetic alternative to concrete bridges their competitiveness depends on several circumstances such as site conditions local costs of material and staff and the contractor s experience beside

the classical solutions the new ones with efficient design and construction improve and consolidate the market position of steel construction and steel producing industry the book contains the technical description the construction details economic aspects and the results of monitoring and testing of already executed bridge structures implementing composite dowels realised within the research rfcs project entitled eco bridge

ai cybersecurity threats challenges and solutions is a comprehensive guide that navigates the evolving landscape of ai powered cybersecurity organized into seven chapters the book begins with an introduction to ai s role in cyber defense and traces the evolution of cyber threats it examines ai driven threats explores advanced detection and prevention techniques and addresses the challenges posed by adversarial attacks and biases in ai systems further the book discusses ai applications in incident response forensic analysis and recovery planning while presenting innovative cybersecurity solutions leveraging ai technologies concluding with ethical considerations and future challenges this book serves as a valuable resource for students professionals and researchers seeking insights into the dynamic and critical intersection of ai and cybersecurity

adsorption from solutions of non electrolytes provides a general discussion of the subject which has so far been given little or no attention in current textbooks of physical chemistry a general view of the subject is particularly needed at a time when we wish to see how far it will be possible to use theories of solutions to explain the phenomena of adsorption the book opens with an introductory chapter on the types of interface aspects of adsorption from solution types of adsorption and classification of systems this is followed by separate chapters on experimental methods adsorption at the liquid solid interface adsorption from completely miscible and partially liquids adsorption of gases and solids from solution adsorption of polymers and adsorption in multicomponent systems subsequent chapters deal with factors influencing competitive adsorption at the liquid solid interface adsorption at the liquid vapor and liquid liquid interface kinetics and thermodynamics of adsorption from the liquid phase the use of columns in adsorption and use of adsorption from solution to measure surface area

global problems global solutions prospects for a better world by joann chirico approaches social problems from a global perspective with an emphasis on using one s sociological imagination perfect for instructors who involve students in research this text connects problems borne by individuals to regional global and historical forces and stresses the importance of evidence in forming opinions and policies addressing social issues the book introduces readers to the complexities of the major problems that confront us today such as violent conflict poverty climate change human trafficking and other issues that we encounter in our lives it book concludes with a chapter on politics and government underscoring the need for good governance at all levels and cooperation among many layers of
